Flushing your wipes costs all of us in Atlanta big bucks.

Be a part of the solution:
Place used wipes in the trash...
EVERY single time!

Flushing all types of wipes can cause toilet overflows, expensive plumbing repairs, clogged pumps and sewer systems, and expensive damage to septic systems. Wipes are not designed to be flushed. Sooner or later they'll get stuck, either in your home plumbing or your town's sewer system.

- At home, all types of wipes can clog your plumbing, leading to messy toilet overflows and costly repairs.
- Even more serious, they also clog pumps and damage sewer systems, which costs us all big bucks.

CITY OF ATLANTA
Department of Watershed Management

A Partnership with:

The City of Atlanta Department of Watershed Management spent more than \$1 million to make repairs to the treatment plant due to the clogging of pumps like this by wipes and other items that should not be flushed.
